GNU GPLv2 Source Code Written Offer

Product: AMPIRE CPS091, AMPIRE CPM103
Firmware Version: T86_1026
Issued by: AMPIRE Electronics GmbH&Co.KG
Contact Email: info@ampire.de
Date: 2026-10-09

This product incorporates the Linux kernel, which is licensed under the GNU General Public License Version 2 (GPLv2).

In compliance with GPLv2 terms, we hereby make a written offer:
For a period of at least three (3) years from the date of distribution of this product, we will provide the complete corresponding source code of the Linux kernel used in this firmware upon request.
The source package includes, but is not limited to:
1. Linux kernel source code (Linux 5.15)
2. Kernel configuration file (.config)
3. Custom patches and modifications applied to the kernel
4. Build / compilation scripts required to compile the matching kernel binary.

To request source code, please send an email to info@ampire.de with the product model and firmware version.
We will deliver the source code via download link within a reasonable time after receiving your valid request.

This offer is valid for any party who receives this product.
