

c.LOGiC-Interface

C4-LR15-NC

Compatible with Land Rover touch-screen system generation 4 from model year 2015

Product features

- Plug and play multimedia interface
- 3 AV-inputs
- Optional control of after-market navigation NAV-NKSUNIR4 and of 2 after-market devices
 - (e.g. DVD-player, DVB-T tuner) by factory touch-screen
- Rear-view camera input
- Rear-view camera power (+12V max 1A)
- Automatic switching to rear-view camera input
- Video-in-motion
- Rear-seat-entertainment output for AV-sources connected to the c.LOGiC
- USB update-port for software-updates by consumer

Contents

1. Prior to Installation

- 1.1. Delivery contents
- 1.2. Check compatibility of vehicle and accessories
- 1.3. Setting the dip-switches of the Interface-box C4C-M817-NC
- 1.4. LED's of the interface-box C4C-M817-NC

2. Connection schema

3. Installation

- 3.1. Connecting interface-box and harnesses
- 3.2. Connection to the factory monitor
- 3.3. Connection to the vehicle AUX-input
- 3.4. Connecting peripheral devices
- 3.4.1. AV-source(s)
- 3.4.2. After-market navigation NAV-NKSUNIR4
- 3.4.3. Factory rear-view camera
- 3.4.4. After-market rear-view camera
- 3.4.5. Rear-seat-entertainment

4. Operation

- 4.1. Activation of the video-in-motion function
- 4.2. Selecting the c.LOGiC as current AV-source
- 4.3. Control of the after-market navigation NAV-NKSUNIR4
- 4.4. Assigning device controls for connected AV-source (AV2/3)
- 4.5. Control of the AV-sources by factory touch-screen (DVB-T/DVD)

5. Specifications

6. Connections (interface-box)

7. Technical support

Legal Information

By law, watching moving pictures while driving is prohibited, the driver must not be distracted. We do not accept any liability for material damage or personal injury resulting, directly or indirectly, from installation or operation of this product. This product should only be used while standing or to display fixed menus or rear-view-camera video when the vehicle is moving, for example the MP3 menu for DVD upgrades.

Changes/updates of the vehicle's software can cause malfunctions of the interface. We offer free software-updates for our interfaces for one year after purchase. To receive a free update, the interface must be sent in at own cost. Labor cost for and other expenses involved with the software-updates will not be refunded.

1. Prior to installation

Read the manual prior to installation. Technical knowledge is necessary for installation. The place of installation must be free of moisture and away from heat sources.

1.1. Delivery contents

1.2. Check compatibility of vehicle and accessories

Requirements					
Vehicle	Land Rover vehi	Land Rover vehicles from year 2015			
Navigation	Touch-screen sy	Touch-screen system version 4 (with Quadlock connector)			
Audio-AUX	A factory audio-	A factory audio-AUX input is required.			
Version I	Redo PMA 9013 Fredori DAS CC CC	Verse mont 20222 00:00 ur © Verse ver	Version IV		
Limitations					
Video-sources	Only compatible to NTSC-sources.				
Factory-PDC	<i>ctory-PDC</i> The factory-PDC picture isn't available by connecting the interface. Acoustic signals are still existing.				

1.3. Setting the dip-switches of the interface-box C4C-M817-NC

With the interface-box dip-switches it is possible to activate or deactivate the video-inmotion (dip 1), AV 2 (dip 2) and AV 3 (dip 3).

Dip position "down" is OFF and position "up" is ON.

0	N			W	Έ
					1
1	2	3	4	5	6

Dip-switch	ON	OFF	
Dip 1	Rear-view camera On	Rear-view camera OFF	
Dip 2	AV2 On	AV2 Off	
Dip 3	AV3 On	AV3 Off	
Dip 4-6	No function		

After each change of the dip switch settings you have to execute a power reset of the c.LOGiC interface-box!

1.4. LED's of the interface-Box C4C-M817-NC

2. Connection schema

3. Installation

Manual

Switch off ignition and disconnect the vehicle's battery! If according to factory rules disconnecting the battery has to be avoided, it is usually sufficient to put the vehicle in sleep-mode. In case the sleep-mode does not show success, disconnect the battery with a resistor lead.

Place of installation is on the rear of the head unit.

3.1. Connecting interface-box and harnesses

- 1 Connect female 18pin Micro-Fit connector of harness C4C-LR05-NC to the male 18pin Micro-Fit connector (POWER/CAN) on the front of the interface-box C4C-M817-NC.
- 2 Connect female 4pin Micro-Fit connector of IR-Cable C2C-IR to the male 4pin Micro-Fit connector (RC) on the front of the interface-box C4C-M817-NC.
- 3 Connect female 6pin Micro-Fit connector of the AV-cable CAB-AV-6P to the male 6pin Micro-Fit connector (AV2/3) on the rear of the interface-box C4C-M817-NC.

3.2. Connection to the factory monitor

Transfer Quadlock connector of vehicle harness from rear of the head unit into male Quadlock connector of harness C4C-LR05-NC.

Plug female Quadlock connector of harness C4C-LR05-NC into male Quadlock socket on the rear of the head unit.

2

3.3. Connection to the factory AUX-input

Connect the factory 3,5mmjack bush audio AUX adapter of the factory AUX-input to the female RCA-connectors of harness C4C-LR05-NC by optional RCA-adapter.

Note: If connecting a rear-set-entertainment an optional RCA Y-cable is plugged in between, see chapter "Rear-seat-entertainment".

3.4. Connecting peripheral devices

It is possible to connect 3 after-market AV-sources, an after-market rear-view camera and rear-seat-entertainment to the c.LOGiC interface.

Before final installation of the peripheral devices, we recommend to test-run the c.LOGiC functions to detect incompatibility of vehicle, navigation, factory accessories or peripheral devices as soon as possible.

Note: Only compatible to NTSC video-sources.

3.4.1. AV-source(s)

The c.LOGiC interface has the possibility to connect and remotely control by factory touchscreen 3 after-market devices. **AV1 is fix pre-programmed:**

AV1 – After-Market Navigation NAV-NKSUNIR4

Note: With the loose white-black cable of harness C4C-LR05-NC it is possible to deactivate AV1.

- +12V = AV1 deactivated
- OV = AV1 activated

Connect the AV-RCAs of AV-source 2 and the AV-RCAs of AV-source 3 to the female RCA connectors of the respective AV-cable CAB-AV-6P (AV2/3).

Using the respective STA-xxx IR-control cable, interconnect the blue-black (yellowblack) female 3pin AMP connector of IR-cable C2C-IR and the IR-port of the AV-source 1 (AV-source 2).

Connect video RCA of AV-source 1 (NAV-NKSUNIR4) to female RCA connector NAV-AV1 on the rear of the interface-box C4C-M817-NC by RCA-adapter CAB-RCA1-15.

See chapter "After-market navigation NAV-NKSUNIR4" for detailed information about connection.

Note: It is also possible to connect an AV-source without control by factory touchscreen to AV1. In this case you need another AV-cable CAB-AV-6P (connection to 6pin MicroFir connector AV1 on the rear of interface-box C4C-M817-NC).

3.4.2. After-market navigation NAV-NKSUNIR4

- 1 Connect video RCA of NAV-NKSUNIR4 to female RCA connector NAV-AV1 on the rear of the interface-box C4C-M817-NC by RCA-adapter CAB-RCA1-15.
- 2 Connect the round male 13pin connector of harness C4C-LR05-NC to the round female 13pin RGB connector of the NAV-NKSUNIR4.

Connect the female 6pin connector of harness C4C-LR05-NC to the male 6pin POWER connector of the NAV-NKSUNIR4.

Page 10

3.4.2.1. Special case: Activation of the NAV-button

With the loose green-black cable of harness C4C-LR05-NC it is possible to activate the NAV-button.

• +12V = NAV-button activated

3.4.3. Factory rear-view camera

<u>If existing</u>, disconnect the original blue double Fakra socket from the Head Unit and connect it to the double Fakra male plug of harness C4C-LR05-NC.

Connect the video RCA of harness C4C-LR05-NC to the female RCA connector R-CAM of the interface-box C4C-M817-NC.

3.4.4. After-market rear-view camera

- 1) Connect the video RCA of the after-market rear-view camera to the female RCA connector R-CAM IN of the interface-box C4C-M817-NC.
- 2 Connect the green wire of harness C4C-LR05-NC to the camera power supply (+12V max. 1A). The green wire is high (+12V) when reverse gear is engaged.

Note: Only compatible to NTSC-cameras.

3.4.5. Rear-seat-entertainment

- 1 Connect the video RCA of the rear-seat-entertainment to the female RCA connector VIDEO-OUT on the rear of the interface-box C4C-M817-NC.
- 2) Connect the audio-RCA of the rear-seat-entertainment to the female RCA connectors of the optional RCA-Y-cable.
- Connect the audio RCA of the optional RCA-Y-cable to the female RCA connectors of the harness C4C-LR05-NC.
 - Connect the audio RCA of the factory AUX-input to the female RCA connectors of the optional RCA-Y-cable (see chapter "Connection to the factory AUX-input").

Note: The last source keeps active on rear-seat-entertainment if you switch the navigation to OEM mode.

4. Operation

4.1. Activation of the video-in-motion function

The video-in-motion function is activated permanently without disturbing the navigation performance.

4.2. Selecting the c.LOGiC as current AV-source

At first **activate** the **AUX** to choose the c.LOGiC as current AV-source:

- press AUDIO/VIDEO button
- choose My Music
- choose **Option +**
- choose **AUX**

Press **AUDIO/VIDEO button for 3 seconds** after activation of AUX to select the c.LOGiC as current AV-source.

Short press **AUDIO/VIDEO button** to switch the AV-sources. Each repetition will switch to the next enabled input. If AV3 isn't activated it will be skipped.

4.3. Control of the after-market navigation NAV-NKSUNIR4

It is possible to control an after-market navigation NAV-NKSUNIR4 connected to AV1 by factory touch-screen.

Make display calibration for the after-market navigation NAV-NKSUNIR4:

Dage 14

Remove the SD card from the NAV-NKSUNIR4 navigation and confirm the dialog box.

Select the "Calibration" menu point.

Select the "Setting" menu point.

Carefully press and briefly hold stylus on the center of the target. Repeat as the target moves around the screen.

Start the display calibration. After successful calibration put back the SD card to NAV-NKSUNIR4 navigation (navigation software start automatically).

4.4. Assigning device controls for connected AV-sources (AV2/3)

After selecting the c.LOGiC as current AV-source (see chapter "Selecting the c.LOGiC as current AV-source") choose the relevant AV-source (AV2 or AV3) by short pressing the AUDIO/VIDEO button. After it:

- Press AUDIO/VIDEO button for 3 sec.(back into the factory mode)
- Press AUDIO/VIDEO button for 10 sec. (interface switches to the last AV-source and starts the programming mode), the blue LED is blinking fast
- within 40 seconds, enter the device-related IR-code for AV2 (AV3) as described in device control table (appendix A) by touch-screen, see picture of apportionment of the numbers below

the blue LED is blinking as often as the corresponding number of the RC-code (e.g. the blue LED is blinking 10 times for RC-code "10").
Do not press any button or the touch-screen while the blue LED is blinking because the programming will not be stored and must be restarted!!!

Note: The IR-control channels for AV2 and AV3 are preset to RC-Code 41 compatible DVB-T tuners.

4.5. Control of the AV-sources by touch-screen (DVB-T/ DVD)

It is possible to control the AV-sources connected to AV2 and AV3 by factory touch-screen. The factory touch-screen is divided into 9 areas. The picture below shows the functions of the AV-source which can be executed by short pressing (left function) and long pressing (about 2 sec., right function) the appropriate touch-screen area. The function description equals the remote control buttons of the AV-sources' remote control.

	TV: SCAN / POWER DVD: ZOOM / POWER	TV: UP / INFO OVD: UP / TITLE	TV: EPG / AV DVD: PBC / AV	
10 F	TV: LEFT / VOL- OVD: LEFT / VOL-	TV: ENTER / PLAY DVD: ENTER / PLAY	TV: RIGHT / VOL+ DVD: RIGHT / VOL+	6
×	TV: EXIT / LANG DVD: STOP / SUB	TV: DOWN / AUDIO DVD: DOWN / AUDIO	TV: MENU / DISPLAY	۲

Note: Additionally to the control via factory touch-screen, it is possible to install the original IR-sensor of the AV-source. By using the Y-adapter STA-Y for the IR-Port of the AV-source, the controls of touch-screen AND device's IR-sensor can be connected and used simultaneously. Installation of the IR-sensor is recommended as the controls via touch-screen are limited, and not all functions may be covered.

5. Specifications

Operation voltage	10.5 – 14.8V DC
Stand-by power drain	11mA
Operation power drain	36mA
Power consumption	0.5W
Temperature range	-30°C to +80°C
Weight	190g
Measurements (box only) B x H x T	105 x 30 x 84 mm

6. Connections (interface-box)
